Why should you choose

SCOIS

for

Academic and Career Information?

SC Occupational Information System

Helping People Explore a World of Possibilities

Answer: Reasons for Choosing SCCIS

Answer: We Are Dedicated...

Quality
First and foremost, CIS content developers are committed to quality content—without good information, career planners cannot develop good plans.

Inclusiveness
CIS content includes all education and work aspirations. For example, CIS occupation information includes all types of work, ensuring access to relevant information for each and every person, not just the college bound.

System Integrity
CIS is a true system of career information, not several resources associated together by a common website. Content so that career planners can begin their exploration and research anywhere and move through the information, linking the world of work to the world of education in a transparent and accurate way.

Relevance
CIS components allow users to enter their personal preferences to locate occupations, schools and financial aid relevant to their interests.

Training and Service
In addition to the CIS software, licensed sites receive free curriculum resources, online materials, technical assistance, training and phone consultation.

Value
CIS provides an array of components and services.

Research-based
CIS is maintained by *intoCAREERS* a unit within the College of Education at the University of Oregon.

Collaboration
intoCAREERS seeks the input of all users to enhance CIS. The CIS Network includes several state-based organizations whose mission is to serve the career development needs of their respective states, including South Carolina.

SCOIS (S.C. Occupational Information System) is South Carolina's Official Career Information System. As the state program, SCOIS is authorized by both Federal and State Law and is mandated to provide a vast array of Career Development products and services including the State's Computerized Career Resource Network.

SCOIS is strongly supported by school districts across South Carolina and by the State Legislature in the S.C. Educational and Economic Development Act of 2005.

South Carolina students and educators have used SCOIS career development resources for over 40 years. SCOIS resources are used in grades K-12, providing students and their parents with career information, helping them develop their career and educational goals. Students also use SCOIS to better prepare their Individual Graduation Plans (IGP)s.

SCOIS Partner Agencies

SC Department of Employement and Workforce

SC Department of Education

SC Vocational Rehabilitation

SC Department of Labor, Licensing and Regulation

SC Commission on Higher Education

SC Technical College System
